

Biomass – This map shows the possible locations and size of facilities that could use forest biomass (wood chips, bark, leaves, etc) to generate electricity. The larger the circle, the bigger the facility could be (because there are more resources available nearby). From: K.C. Irving Chair In Sustainable Development, University of Moncton, FOREST BIOMASS TO ENERGY ATLAS OF NEW BRUNSWICK, <http://www2.gnb.ca/content/dam/gnb/Departments/en/pdf/Maps-Cartes/201210BiomassReport.pdf>
