**Viewing the two worst passwords lists on the bbtbn.ca website under digital security answer the following questions.**

1. Would you say the passwords listed as the worst are easy to guess or hard to guess and why? (2)
2. Have you ever used any of these passwords? If yes how do you feel about this list? If NO why not? (2)
3. Do you think seniors and adults are more likely to use these passwords? What can we do to save them some disastrous consequences if they do? (2)
4. Can you think of three extra horrible passwords not found on this list? (3)
5. How long should a modern password be to be called strong? (This might be a trick quest) (2)
6. If you are using any passwords similar to these make sure to go home tonight or use some time right now to change these passwords to something less risky and more secure. **THIS IS IMPORTANT HOMEWORK !**

Please submit you answers to you teacher when complete in a way that they have suggested.
